

Pathfinders for Change

The Power of Mind-shifts

A Mental DNA for Our Future

Presenters

John Edge

Christine Thompson

The Change Coding

Remember from webinar one
Mind-shifts create the critical
transition, that overwrite our old
mindsets ...

The Mind-shift journey

Human repositioning

The past

... and align us to our new future
possibilities.

The future

**But how can Mind-shifts
be so effective at
connecting to ideas for a
new future?**

... So let's think about how our minds connect

Where do 'Eureka!' moments come from? Those amazing new inspirations?

**From Books
and Writings?**

Where do 'Eureka!' moments come from? Those amazing new inspirations?

Einstein's inspired revelation of $E=mc^2$ took 103 years to be finally proved! (by the French CNRS)

"The most beautiful thing we can experience is the mysterious. It is the source of all art and science."

*Albert Einstein scientist,
1879 - 1955*

**Beyond us -
from higher
sources?**

And how are all kinds of strange connections made in our world

- The extraordinary appearance of inspirational music
- Simultaneous discoveries in sciences
- Connections between identical twins
- Appearance of pyramids across the world
- The sensitivity of animals to tsunamis
- 'Telepathy' particularly in indigenous peoples

To name but a few!

Egyptian Pyramid

Mexican Pyramid

In addition for centuries the wise have known the power and importance of thoughts

‘Thoughts create a new heaven, a new firmament, a new source of energy, from which new arts flow.’

Paracelsus, physician 1493 - 1541

And today researchers are revealing how positive thoughts, ‘prayer’ and meditation can help in healing processes in all kinds of ways.

Indeed new sciences are discovering that we and the universe are quite extraordinarily interconnected.

... In the Universe

“The re-enchanted world is a harmonious structure where all things interact with all other things and together create a coherent whole. ... it is more like a living organism than a machine”

... In the Human

“The mind achieves spontaneous coherence with other minds, and even with other elements in it’s environment
Consciousness is not limited to the signals conveyed by the senses.”

All quotes from Irvin Laszlo, scientist, 1935 -

So in this interconnected universe, here are Four Key Concepts that show how the power of our Mind-shifts - how we change the way we think - can also change our lives and our evolutionary possibility

KEY CONCEPT 1

'You become what you think about'...

This is the one great truth upon which the wise
across the ages have agreed.

KEY CONCEPT 1

Our minds are the sum total of our thoughts, values and principles...

'Your mind will be like it's habitual thoughts'

Marcus Aurelius, philosopher, warrior 120 - 180

KEY CONCEPT 1

... Indeed, at a cellular level we can even change our evolutionary destiny

It really is time to stop thinking of our DNA as immutable. Even thinking can change it.”

Newsweek

KEY CONCEPT 2

Externally too the world around us is influenced by what we think and transmit

“How you treat someone and make a decision, how you feel when you arrive home, all this is felt by your pet, and by the trees and greenery around you. ... your smile, your intelligence, your insight, your eyes, give the world something totally unique.”

Princess Irene of the Netherlands, social educator, 1939 -

KEY CONCEPT 2

Therefore, to change our individual ideas and values is also to change our environment and civilisation.

The Times sought views on 'The problem with the world'. GK Chesterton replied '*Dear Sirs. I am. Yours Sincerely*'

KEY CONCEPT 3

Musicians know that when you ring one tuning fork, other tuning forks on the same frequency begin to vibrate in response

KEY CONCEPT 3

So next we create webs of sympathy with others whose ideas and values are on the same wavelength, on the 'tuning fork' principle that *'Like goes to like'*.

“A small group of thoughtful people could change the world. Indeed, it's the only thing that ever has.”

Margaret Mead, anthropologist, 1901 - 1978

KEY CONCEPT 4

Woven together, the mind-sets, spiritual values and consciousness create a *Mental Net* ...

KEY CONCEPT 4

Woven together, the mind-sets, spiritual values and consciousness create a *Mental Net ...*

in which to catch the new ideas as they emerge from the future that is rushing towards us – *individually* and *collectively*

“The human mind is a channel through which things-to-be are coming into the realm of things-that-are.”

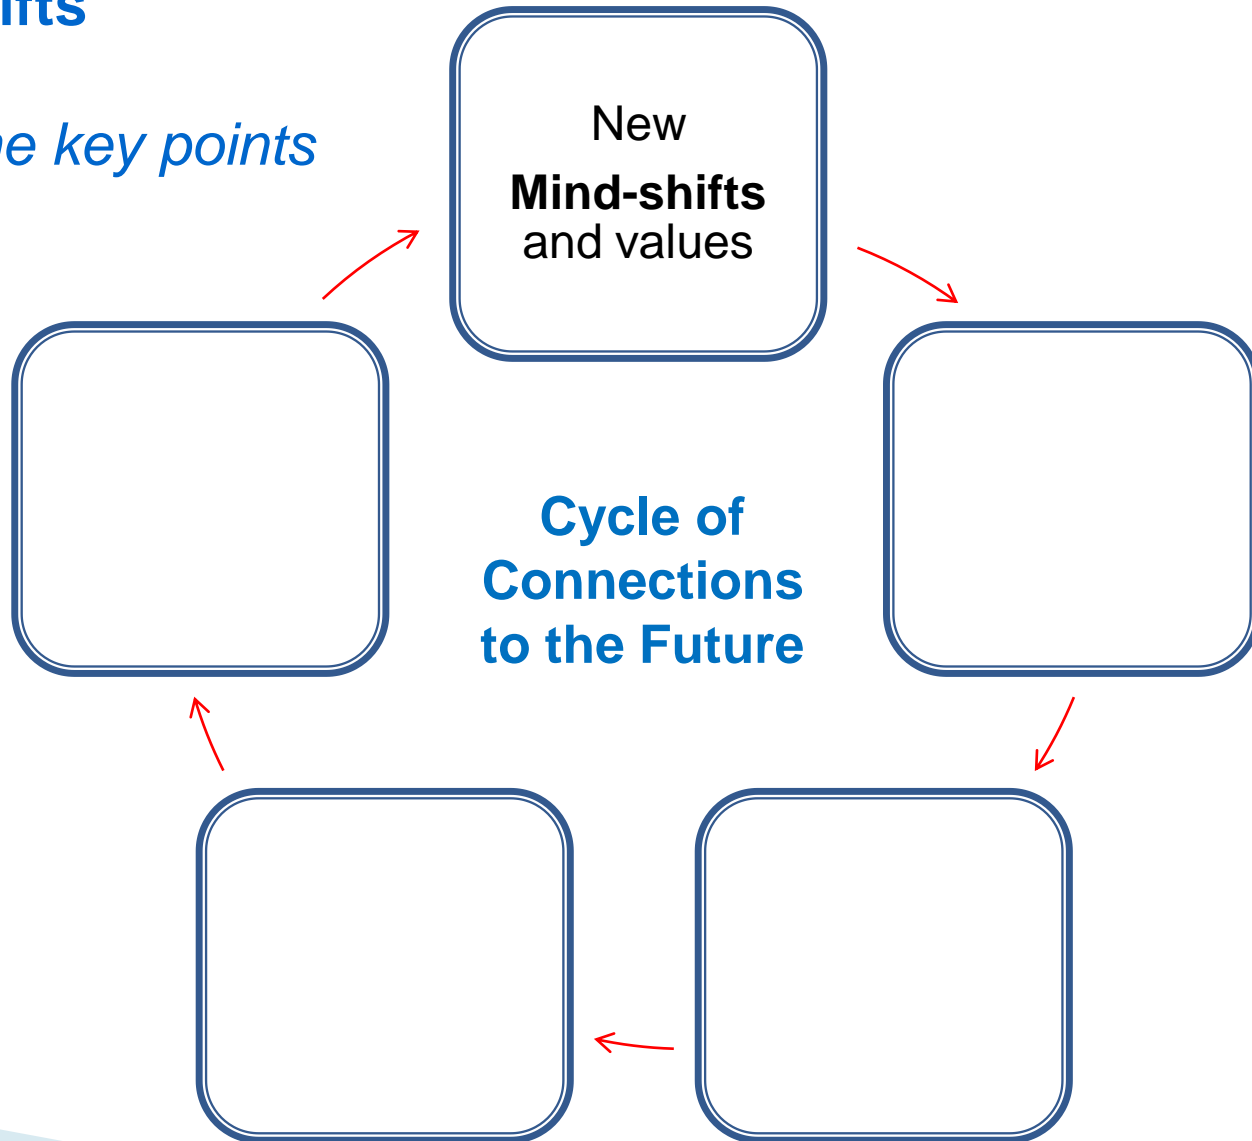

Henry Ford, industrialist, theosophist 1863- 1947

To recap the key points

Critically each cycle *elevates* and
creates *stronger connections*

It becomes an upward
spiral ...

Thus finally the power
of Mind-shifts is that
they are like a mental
DNA for our reception
of the future.
